DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Palenik III (3987579).

Palenik III discloses a universal fixture having a plurality of dual axis clamps (38) each are rotatably and slidably secured rods (fig.3), and a base (13). Palenik III discloses enough parts to anticipates all claim pluralities.

Response to Arguments

3. **Applicant's arguments filed 3/10/03 have been fully considered but they are not persuasive.**

4. **Applicant's arguments with respect to claims have been considered.**

a. Applicant argues that the rods of the prior art are not securable to blocks but that is not true.

b. There is no structure being claimed that locks or allows the rods to slide relative to each other .

Art Unit: 3723

c. Applicant argues that rods do not lock but if the rods are secured from movement they are locked. Applicant should claim the structure that locks especially since this limitation since patentability is being based on it.

d. The claims will always have some angle that can be considered an arbitrary angle.

e. Applicant argues that the prior art does not disclose universal holding fixture because of its intended use; however, if a device can support a workpiece it would then be useable as a workholder.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lee Wilson whose telephone number is (703) 305-4094.
